- Pushed carts from outside to inside for customer convenience

SUMMARY STATEMENT

With a passion for working with computers and software for educational purposes, alongside personal experiences with it as a hobby, I feel I am proficient at creating digital content. This is limited but not included to documents, spreadsheets, powerpoints, videos, photo edits, and blog posts. Even when it comes to entry positions to things I may be unfamiliar with, I am a fast learner and always have the drive to learn new skills and boost familiar ones when opportunities arise. As of 2026, I have gained even more experience becoming a full-stack web developer.
